NirvanaOnline

FREQUENTLY ASKED QUESTIONS

How do I set where I spawn at? When you enter any game world, you should see a blue kiosk made out of Lapis Blocks with a sign that says “Reset Spawn” or “Set Checkpoint”. Click the button below the sign to save your respawn location to that kiosk. You’ll find a similar kiosk at the entrance to most Raids and Vaults around NirvanaOnline!

Where do I find something to do? How do I get more money? Most forms of content around NirvanaOnline will grant you money for completing them. To find this content, head into one of our many Game Worlds by using warps like **/warp Chernobyl** or **/warp Arkoneux**. You’ll spawn in at world hub for whichever world you choose. Take a look around and notice the colored teleporters around the area. These will send you to different Activities within that game world. Each teleporter is color-coded based on the type of activity you’ll be entering. Strikes (orange teleporters) are a great place to start if you don’t mind a couple puzzles and a moderate amount of combat. If you like to be a little more relaxed, try out our Mazes, Parkour Courses, or Hop-Putt (mini golf) Courses!

How do I spend money? Use **/warp Shop** to head to the Monastery Shop where we sell everything from Diamond Swords to Apples. If you’re in need of Potions you can use **/warp Potions** to visit the Potion Shop. If you’re in need of a Shulker Box you can use **/warp Shulker** to visit the Shulker Box Shop. If you’d like to buy Fireworks you can use **/warp Fireworks** to visit the Fireworks Shop. If you need to sell an item back to the server for Credits, you can use **/warp BuyBack** to visit the BuyBack Shop.

How do I exchange Emeralds for Credits and vice-versa? Use **/warp Emeralds** to visit the area of the shop that lets you turn Credits into Emeralds and Emeralds into Credits. Emeralds and Credits are exchanged at a 1:1 ratio, so you can convert them back and forth as much as you’d like!

Why can’t I place/destroy blocks? NirvanaOnline is an Adventure MMO Server at its core, so most of the challenges you encounter around the game are designed to be completed without needing to place/remove blocks from the game world. If you’d like to play a regular Survival Server, we have a sister server available by typing **/Server Survival** from anywhere within the NirvanaOnline SuperServer.

How do I get rid of the sidebar on the left side of my screen? Use **/Asb Toggle** to remove the sidebar or add it again. We recommend keeping the sidebar up because it’ll provide you with essential information for whatever game world you are in!

Where do I go to fight with other players? If you head to the following worlds, you’ll be able to fight each other: Mortieu, Zombies In Paradise, Zombie Avalanche, Dominion, and now in Showdown Town (if you’re looking for a more arena-like experience).

I just got some Apples and some Credits. What happened? The server gives all players a small stimulus of 4 Apples and 5 Credits for every 15 minutes of playtime to keep you fed and help you purchase some items when you need them, even if you’re not completing Strikes and Raids. Completing content in the game worlds of NirvanaOnline will always help you get money faster, but the server gives out a little bit every 15 minutes to make sure that even our sandbox explorers are never without their essentials.

What are Guilds? How do I join them? Guilds are a new way for you to customize your NirvanaOnline experience by joining one of our new factions! Guilds specialize in a certain type of gameplay, and yes, you can be a member of every Guild in the game if you’d like! Some of the Guilds you’ll find around NirvanaOnline are the Fisherman’s Guild (specializes in fishing), the Brawler’s Guild (specializes in player-versus player combat), the Smuggler’s Guild (specializes in secretly transporting Strange Spice), the Hunter’s Guild (specializes in hunting monsters and mobs), and the Slasher’s Guild (specializes in high-level Vault challenges). Use their warps to visit them all and see which ones are right for you!

What are Raids and Vaults? Raids and Vaults are essentially much larger and more dangerous versions of Strikes. This means that you’ll be tasked with getting from the begging of the level to the end while fighting off waves of enemies, solving puzzles, jumping through parkour sections, and more! Raids are geared towards groups of 4 players, though almost all of them can be completed solo if you’re brave enough! Vaults are geared towards 12 players and are considered to be the pinnacle of NirvanaOnline content. Many of these can be completed with as little as 1 or 2 players if you’re brave enough, and have some truly epic armor and weapons!
